Third Party Plugin Folders

LOGIC	PA	UAD	WAVES MONO	WAVES STEREO					
MULTI	FOLDERS	FLEXI-DECK	GO TO	USER MENU	STEMS	TRACKS EDIT	REGION EDIT		ON / OFF

The Flexi-Deck & Go To Buttons invoke Plugin Folders that are created in Logic Pro's Plugin Manager.

Flexi-Deck & Go To Folders.
User Defined via the Plugin Manager

SETUP

To assign powerful Midi parameters to Flexi-deck Macros requires a few simple steps.

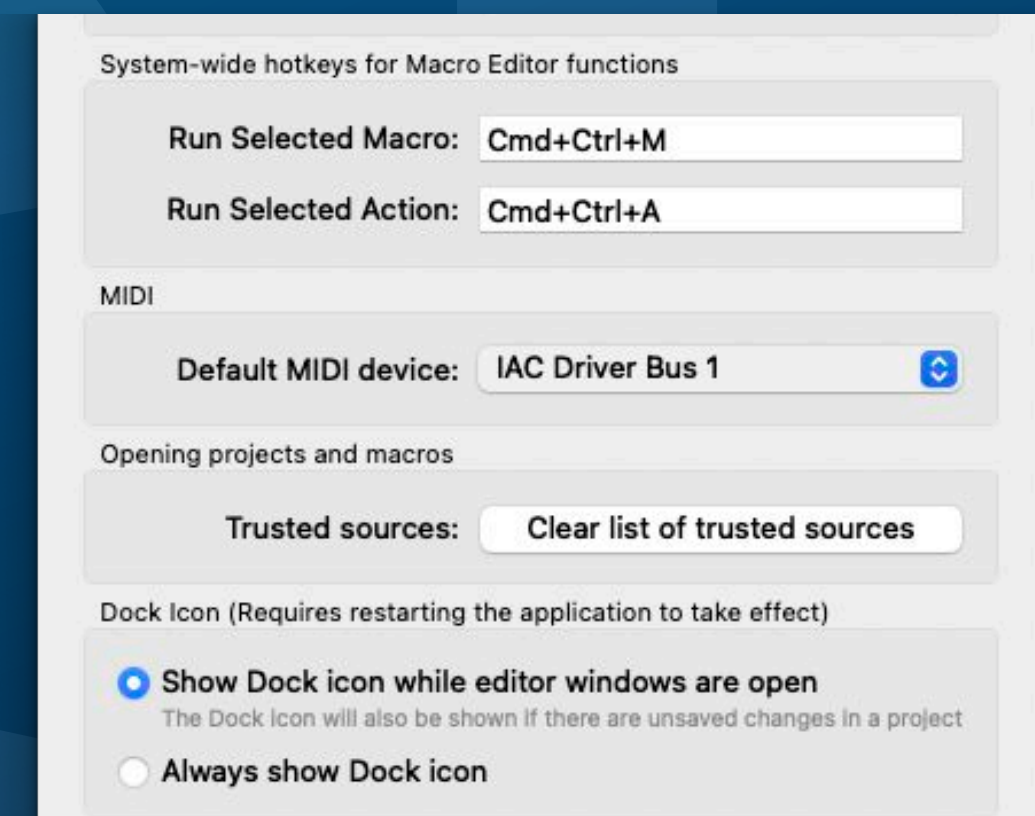

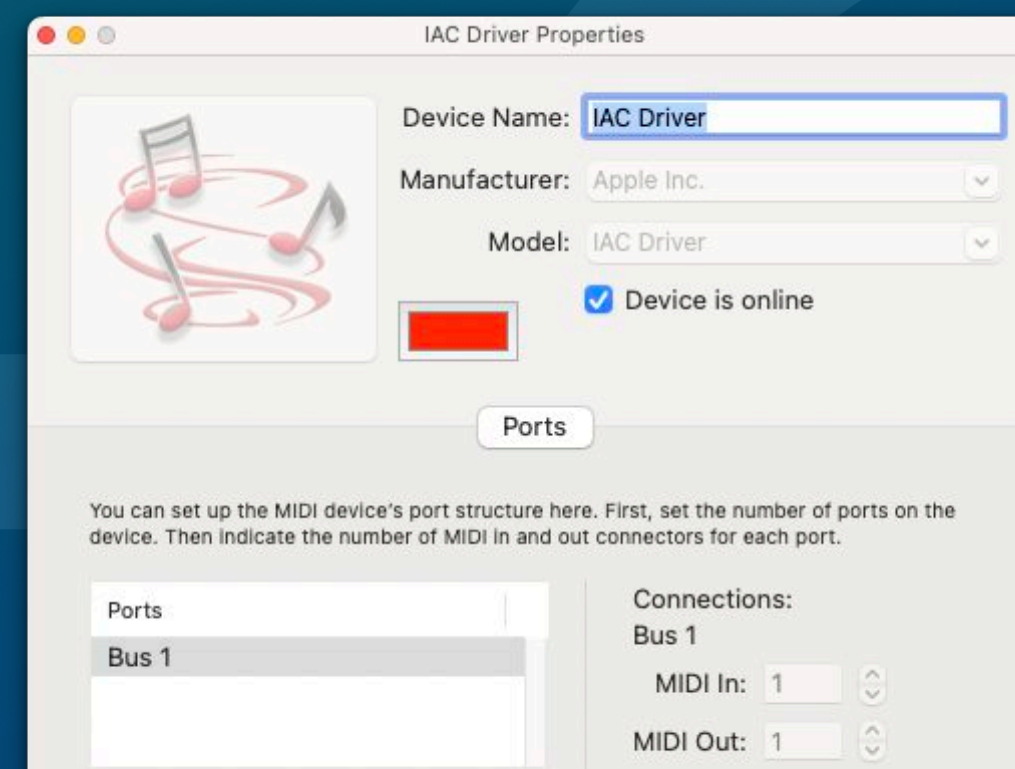

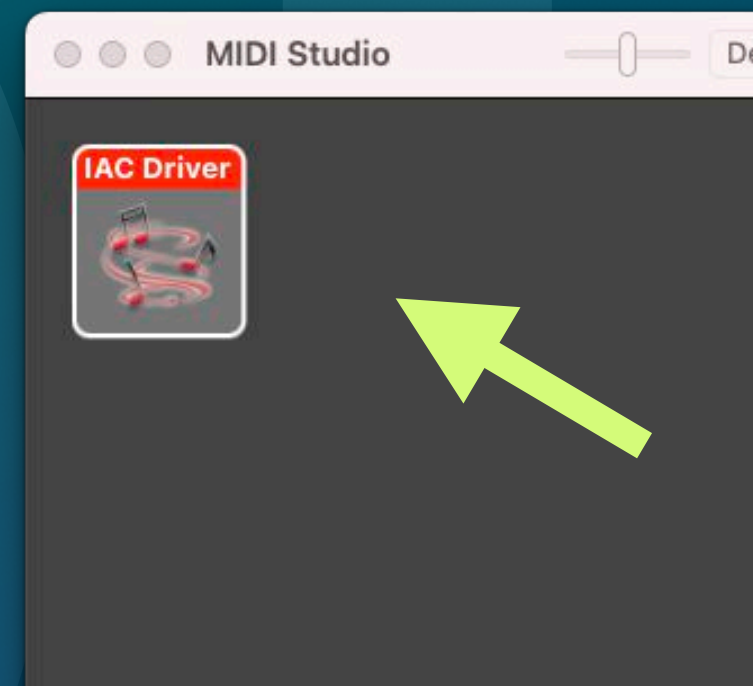

On your Mac, Open the 'Audio Midi Setup' App. Go to the 'Window' Menu and open 'Midi Studio'. Double click on the 'IAC Driver' Icon and in the following window tick the checkbox that says 'Device is online'.

Open the Flexi-deck App.

Navigate to Preferences... From the 'Default Midi Device' drop down menu choose 'IAC Driver'.

Audio Midi Setup

* Midi Out from Flexi-deck only.

* Requires the Creator App.

Preparation for Stem Bouncing requires that the target Tracks, VCA's or Buses are in sequence and next to each other in the Arrange Window.

Of equal Importance is for the User to stipulate the Bounce length with the Locators, Destination Folder and preferred File Type.

Finally the User chooses the amount of Stems required.

* Avoid bouncing into a destination folder where a file with the same name already exists.

MULTI	FOLDERS	FLEXI-DECK	GO TO	USER MENU	STEMS	TRACKS EDIT	REGION EDIT		ON / OFF

The Tracks Menu is full with workflow enhancing macros.

Highlights.

CREATE.

Multiple Audio and Midi tracks with a single click. '8 Backing Vocal Tracks' will not only create the audio tracks but name them, alternately pan the them and reduce their fader volume by 10db .

RENAME.

Manage your Tracks by simply naming the first and then clicking 'User Name' 4 - 24 and let the macros take care of the work.

PLUGIN CHAINS.

Single click on a macro to load Multiple Vocal or Guitar Plugins onto your selected channel.
